

# Toddler Room Philosophy

In the Toddler Room we understand each child is an individual and all children learn at different paces, therefore we provide the children with a range of activities to provide stimulation and education.

We strive to keep a familiar routine so all children know what is expected of them next. Hygiene is a very big part of our routine, including regular hand washing intervals, as well as regular cleaning procedures. In the Toddler Room we believe in a HAPPY and HEALTHY environment.

We also believe in providing a warm and nurturing environment in which the children can grow in confidence, ability, knowledge and trust, which results in a bond with their educators and peers.

In the Toddler Room we feel the more information we receive about your child the better, it helps us understand your child and your list at home so therefore we can make our environment more consistent with yours at home.

Learning through play is a very big part of our philosophy in the Toddler Room, we encourage them to get down and dirty, play in the sand and water, roll on the grass, explore the creek we have, make mud pies, dig in the mulch and just generally be a toddler – we feel it's the best method of learning within this age group.
